May 11th- May 15th

Monday	Tuesday	Wednesday	Thursday	Friday
11th Objective: Implement knowledge of color theory	12th <i>Continued</i>	13^h <i>Continued</i>	14^h <i>Continued</i>	15th <i>Continued</i>
Agenda: Execute color wheel project.				
Office Hours: 2-3 <i>Via email</i>		Office Hours: 10 am-11am <i>via email</i>		

Monday-Friday

This week your assignment will be a creative collage color wheel. You will find real objects in each of the 12 colors on the color wheel and arrange them in the correct color wheel order (space out the primaries equally distant in a triangle as a first step). You have 2 options how you assemble the collage:

- 1) Physically. Find objects in all the 12 colors and assemble them in a visually pleasing way. Then photograph it! The lighting needs to be good- find the room in your house with the most light. The lighting of the photograph **MUST** be good, especially since this option for the project is easier in some ways. You need to be creative in your presentation- for instance, how will you arrange the objects, what will they be sitting on, what is behind them if anything (I recommend a very plain background so as not to take focus off the color wheel objects)? Is the shot from straight above or from another angle? The composition of the photograph itself should be good- use the same composition principles we discussed for design.

- 2) Digitally. You can individually photograph objects or find them online. If you find them online, they must be a good image, and you will need to trace and mask out the objects from the background, then put the images together in photoshop (or a similar program). The arrangement and overlapping of the pictures should be artfully done. Consider how this might be a creative presentation as well. If there is a background color or texture make sure it isn't distracting. If you use images from online that is easier than photographing your own so if you do that all the objects should show some kind of theme. Like: food, animals, objects you find in an office, nature, etc.

You may want to review this video on how to take good photos from home:
